

The Vision for Jonathan

Where are we headed?

The big picture

There are people who are really committed to Jonathan, who are in his life regularly because they want to be there, knowing him really well, understanding the finer details about him, his wishes and his needs.

Jonathan has lots of friends and has a full social life.

Jonathan has lots of action in his life. He is regularly engaging in the physical activities which interest him.

He is continuing to learn in a practical and purposeful way.

Jonathan is getting paid well in his work roles (as much as anyone else would get for doing the same job) and is doing work which he enjoys and feels good about.

Jonathan is living in a four bedroom home which he shares with friends and/or a partner if he so chooses in a very accessible area of his community.

Jonathan will have the capacity to have complex conversations as a result of successfully exploring technology for communication and/or the community around Jonathan learning to 'read' him very well.

Jonathan will be financially secure and have real choices in his life.

Jonathan will be supported by a team of people who have high levels of job satisfaction from working with Jonathan, in roles which open up pathways for growth and development for them.

Jonathan will be in control of his own life and making his own choices.
